FRANK WITTENBERG,
in the Office of the Librarian of Congress, at Washington.

ALL RIGHTS RESERVED.

CENTRAL PRINTING COMPANY
LITTLE ROCK, ARK.

EXPLANATION.

These Time Tables are arranged one for each month in the year, and show all due dates from every day in each month for twelve months ahead. Time can be calculated by days or by months.

To Time Notes and Bills by Days.—Refer to Table for month of given date. Then add the number of days the note has to run to the given date. The result is the index number of the due date, which is shown by the Table.

Example.—Note dated March 15 at ninety days fixed, is due when? Refer to March Table, and say mentally 90+15=105. Find index number 105 and take corresponding date, June 13.

To Time Notes and Bills by Months.—Refer to Table for month of given date. Then in column marked required number of months and opposite given date, find due date.

Example.—Note dated May 31 at nine months fixed, is due when? Refer to Time Table for May, look under nine months column, opposite May 31, and find due date, February 28.

To Find Days for Discount or Difference in Time Between Dates.—On Time Table of month of first date, find index number of second date. From this subtract first date, the difference is the number of days required.

Example.—Find number of days from September 17 to August 23. Refer to September Table and find index number of August 23. This is 357; subtract 17, leaves 340 days.

Note.—In Leap Year, if the given term includes February 29, drop one day in fixing due date, and add one day in finding time between dates.

Example.—Note dated February 1 at ninety days fixed, is due when, in Leap Year? Refer to February Table, say 90+1=91. Corresponding date is May 2. Drop one day for Leap Year and say May 1.

Example.—Note due April 5, in Leap Year, was discounted on February 10. How many days discount? Index number of April 5 is 64. Say 64—10=54 days. Add one day for Leap Year, and say 55 days.
